Q1.

Here is a set of 20 squares around a shaded space.

What is the area of the shaded space?

squares

1 mark

Q2.

Draw two more lines to complete the triangle with an **area** of 10 cm^2

Q4.

Here is a quadrilateral drawn on a square grid.

On the same grid, draw a **different** quadrilateral that has the **same** area.

1 mark

Q5.

A line starts at **A** and goes along the dotted lines to **B**.

It divides the area of the grid into halves.

Divide the area of the grid below into halves. Start at A and go along the dotted lines to B.

Q6.

Rebecca has rectangular tiles like this.

She makes a larger rectangle using 4 of the tiles.

What is the **area** of the larger rectangle?

Q7.

Here are some shapes drawn on a grid.

Write the letters of the two shapes that are equal in area.

_____ and _____

_ 1 mark

Q8.

Calculate the area of this triangle.

Q9.

Calculate the area of this parallelogram.

1 mark

Q10.

Grace has a rectangle that has sides of 4 cm and 5 cm.

Draw a different rectangle that has the same area.

•	•	•	•	•	•	•	•	•	•	•	•	•
•	•	•	•	·	•	•	•	•	•	•	•	٠

Q11.

Here are five triangles on a square grid.

Four of the triangles have the same area.

Which triangle has a different area?

Q12.

Draw a rectangle on the grid that has **half** the area of the shaded triangle.

Use a ruler.

1 mark

Q13.

A rectangle has an area of 36 cm²

How long could the sides of the rectangle be?

Give three different examples, using whole numbers.

cm	and	cm
cm	and	cm
cm	and	cm

2 marks

Q14.

Boxes measure 2.5 cm by 4.5 cm by 6.2 cm.

The shopkeeper puts them in a tray.

Work out the largest number of boxes which can lie flat in the tray.

2 marks

Q15.

Work out the area of each shape.

(a) Rectangle

Triangle

Q16.

(b)

Leon's grid has two shaded shapes.

Leon says,

"Shape A has a larger area than shape B."

Explain how he could have worked this out.

On this grid draw a **different** shape. It **must** have the **same area** as shape **A**.

1 mark

Q1.

11

Accept 11 cm²

Q2.

Any triangle with a perpendicular height of 4 cm.

Q3.

Any triangle with an area of 8 cm², eg

		\sim	/	_			
				\sim			
		~					

Drawings must be accurate to within 2 mm of appropriate grid intersections.

The triangle need not be shaded and need not have vertices at grid junctions.

Do not penalise drawings done without a ruler, provided the intention is clear.

OR

Accept drawings that overlap the given rectangle or use the edge of the grid, eg

-					-		
/							
	Ζ						
		$^{\prime}$					
			\geq				

OR

[1]

			\leq				
		\angle					
	\angle						
4							

Q4.

Any different quadrilateral with an area of 6 cm², e.g.

Q5.

Any line that partitions the grid into two blocks of 12 squares, eg:

/	4								
B									

Line must run from A to B. Line must be on dotted grid lines only.

Do not accept. lines along the edge of the grid.

Q6.

800

[1]

[1]

Q7.

A and D

Both letters must be correct for the award of the mark. Accept either order. Accept any other clear way of indicating the two correct shapes, such as circling. [1]

[1]

Q8.

54 cm²

Q9.

48 cm²

Q10.

A different rectangle with area 20 cm^2 , e.g. 2 cm × 10 cm rectangle

Q11.

А

Accept alternative unambiguous positive indications of the correct triangle, e.g. 2 $\frac{1}{2}$ or 2.5.

Q12.

A rectangle with area 6 cm²

A rectangle must be drawn but need not be shaded.

Q13.

Award **TWO** marks for three different factor pairs of 36, i.e. any three of the following:

1 and 36

2 and 18

3 and 12

4 and 9

6 and 6

Award ONE mark for two different correct factor pairs of 36

Q14.

Award **TWO** marks for the correct answer of 10, even if there are errors in the working.

If the answer is incorrect, award **ONE** mark for evidence of any attempt at solution, by any method, eg:

• 31 ÷ 6.2 and 9 ÷4.5 are attempted calculations;

[1]

[1]

[1]

[1]

- 31 ÷ 6.2 and 9 ÷4.5 are estimated;
- "You can get two boxes widthways and 5 lengthways".

Up to 2

1

1

[2]

[2]

Q15.

(a)	Rectangle – 14		
(b)	Triangle – 12		

Q16.

- (a) Any statement which indicates an understanding of area, eg:
 - By counting the shaded triangles
 - A's got more triangles than B
 - The amount of triangles is more.
 - A has more shapes than B.
 - B has got less shade.

Do not accept statements which imply linear measurement, eg:

- Shape B is longer.
- B has a longer area.
- He used perimeter.
- A has more edges.

1

1

(b) Any shape which covers 6 triangles, different from the given shape of A. The shape may be composed of part triangles provided the area is equivalent to 6 triangles.

Accept shapes such as 6 triangles joined only by vertices, eg:

Do not accept same shape as A drawn elsewhere on grid.
