Visual Learning Steps for Written Calculations: Multiplication and Division

| Expecte <br> d <br> By end <br> of... | MULTIPLICATION | Key Concepts and Vocab | DIVISION | Key Concepts and Vocab |
| :---: | :---: | :---: | :---: | :---: |
| Year 1 | M1 . Counting in groups with practical/ concrete resources. | This is $5 \times 3$ i.e. 5 three times. <br> groups of sets of multiplied by count in 2s | D1. Sharing with practical resources <br> N | shared by groups of share |
| Year 1 | M2.Grouping in arrays | $4 \times 3$ i.e. 4 three times <br> $3 \times 4$ i.e 3 four times arrays | D2. Grouping with practical/concreete resources. | groups of shapes of patterns of |
| Year 2 | M3. Counting in groups on a number line using practical/concrete resources | 4 lots of 3 How many 3s make 12? repeated addition | D3. Grouping on a number line <br> Step 1 <br> Step 2 | 4 lots of 3 <br> 4 groups of 3 <br> 4 sets of 3 <br> How many times? <br> divide <br> jumps of |

| Year 2 | M4. Counting in groups on a number line | lots of groups of sets of jumps of times multiple of repeated addition | D4. Grouping with a remainder <br> Step 1 <br> Step 2 | How many groups of? Sets of? Jumps of? How many left over? <br> Remainder left left over inverse |
| :---: | :---: | :---: | :---: | :---: |
| Year 3 | M5. Multiply by partitioning $\begin{aligned} & 12 \times 3=36 \\ & 10 \times 3=30 \\ & 10 \times 3=6 \\ & 30+6=366 \end{aligned}$ | Partitioning into Tens and Ones is a vital skill <br> partition multiply recombine/ total product times multiple of | D5. Halving using partioning. <br> Step 1: Evens numbers Step 2: Odd numbers | Partitioning into Tens and Ones is a vital skill. <br> partition divide by 2 half share inverse |
| Year 3 | M6. Doubling using partitioning. <br> Step 1 :Not crossing 10s | Partitioning into Tens and Ones is a vital skill. <br> partition X 2 double near double twice times multiple of | D6.Grouping using the inverse on a number line, no remainder. | Times table knowledge or abilty to use a multiplication grid is vital. <br> divide <br> division divisior groups of quotient |

|  |  |  |  | inverse |
| :---: | :---: | :---: | :---: | :---: |
| Year 4 | M7. Expanded method <br> Estimate $\approx 40 \times 3=120$ | Multiply ones/units first. <br> Always add carrying figures. <br> tens ones/units expanded multiply times multiple of product | D7.Grouping using the inverse on a number line, remainder. | Times table knowledge or abilty to use a multiplication grid is vital. <br> division divisior groups of quotient left over/ remainder inverse |
| Year 4 | M8.Standard written method <br> Estimate $\approx 300 \times 3=900$ OR $340 \times 3=1020$ | Multiply ones/units, then tens then hundreds. <br> HTO <br> multiplicand (342) multiplier (3) multiple of | D8 Short method without a remainder $3123$ | Use arrows to show how division calculation should be read <br> divisor steps dividend (69) divisor (3) quotient (23) inverse check factor divisible by difference |

| Year 4 | M9. Multiplication using a grid Estimate: $\approx 50 \times 20=1000$ $\qquad$ | Partitioning into Tens and Ones is a vital skill. <br> multiply ten times larger total column multiple | D9. Short method with a carried remainder $3 \longdiv { 1 4 5 }$ | Use arrows to show how division calculation should be read <br> divisor steps dividend (45) divisor (3) quotient (15) remainder inverse check factor divisible by difference |
| :---: | :---: | :---: | :---: | :---: |
| Year 5 | M10. Long multiplication <br> Estimate $\approx 40 \times 20=800$ | ```Multiply the units and then the tens. Don't forget the 0 when multiplying 10s and 00 when multiplying 100s. HTO multiplicand ( 342) multiplier (3) total multiple``` | D10. Short method with a remainder <br> (including fraction and decimal remainders) | Using arrows helps to show how division calculation should be read. A good understanding of times tables, inverse operations and remainders is vital. <br> divisor steps dividend divisor quotient remainder |

|  |  |  |  | decimal fraction difference inverse check divisible by factor |
| :---: | :---: | :---: | :---: | :---: |
| $\begin{aligned} & \text { Year } \\ & 5 / 6 \end{aligned}$ | M11. Multiplication of decimals/ money $\begin{array}{r} 1.2 \\ \hline 0 \cdot 3 \\ \hline 3 \cdot 6 \\ \hline \end{array}$ | The place value for this is not correct but it's easier to teach linked to long multiplication and then count the decimal places in the question as this matches the decimal places in the answer. <br> decimal places divisor steps | D11. Short method with a 2 digit divisior. | Count in 5 divisor steps to start. Show remainders as fractions and decimals as in D10. divisor steps dividend divisor remainder decimal fraction quotient inverse check divisible by difference |

| $\begin{aligned} & \text { Year } \\ & 5 / 6 \end{aligned}$ | M12. Multiplication of fractions | Multiply the numerators and denominators. Cancel answers to the lowest/simpliest form. <br> numerator denominator | D12. Division of decimals/money Divisor steps <br> 9 $\frac{0 \cdot 45}{4 \cdot 0 \cdot 5}$ | Line up decimal points. <br> divisor steps dividend divisor remainder decimal fraction quotient divisible by difference |
| :---: | :---: | :---: | :---: | :---: |
| $\begin{aligned} & \text { Year } \\ & 5 / 6 \end{aligned}$ |  |  | D13. Long method for division $\begin{array}{r} 2191 \\ 4 \mid 8764 \\ \frac{81}{07} \\ 4 \\ 4 \\ \hline 36 \\ \frac{36}{} \\ \hline 04 \\ 4 \end{array}$ <br>  | divisor steps dividend divisor remainder decimal fraction quotient divisible by difference |
